### OVERVIEW

jetCenters of Colorado is comprised of three full service Fixed Based Operators (FBOs) along Colorado's Front Range—including Colorado jetCenter (COS), Denver jetCenter (APA), and Fort Collins-Loveland jetCenter (FNL)—where safety, service, and security are their top priorities. They offer flight services for business, general, commercial and military aircraft operations. Their award-winning, professional service combined with the amenities to fully accommodate you, your passengers, and your aircraft make jetCenters of Colorado the preferred FBO network.

Serving aviation is their ONLY business, and they look forward to serving you!

## Visit

Safety is one of the core business functions at jetCenters of Colorado. jetCenters is committed to developing, implementing, maintaining, and constantly improving strategies and processes to ensure their aviation activities take place under a balanced allocation of organizational resources, aimed at achieving the highest level of safety performance - meeting national and international standards.

jetCenters of Colorado ensures safety dictates how all operational objectives are achieved. Three critical elements of their program consist of maintaining an attitude that safety is everyone's job, objectively evaluating operations through key performance indicators, and staying current with industry best practices. To help supplement these elements they established a safety team at each location.

Track record, experience, and longevity distinguish the three FBOs, all of which are the largest and longest standing at each of their airport locations.

*"NATA Safety 1st is one of the most recognized trainings for our industry. We use this program and it helps us to provide better, safer service to our customers!"*

*-Deb Montgomery, President  
Fort Collins-Loveland jetCenter*

## NATA Member Mondays

The National Air Transportation Association's Member Monday series highlights the diverse businesses that make up its membership to show their positive impacts on their communities, the aviation business industry, and the world at large.
